POLYURETHANE

We love it and we live it!

EUROPES LEADING INDEPENDENT **PU SYSTEM HOUSE**

» THIS IS PLIXXENT

POLYURETHANE: WE LOVE IT AND WE LIVE IT!

With our seven system houses we are the qualified partner for all companies seeking high-performance, individual PU-based technologies. Specialising in standard as well as tailor-made systems, we accompany you throughout the entire value chain – from the initial consultation to the after-sales support.

WE WANT TO IMPROVE: YOU, US, EVERYTHING.

In-depth know-how in the development, production and processing of polyurethanes, flexibility in raw material procurement and a team with decades of experience make us a reliable, high-performance partner. Each and every day, we are inspired by the great versatility of polyurethanes. Together with you, we strive to make your products even more successful.

WE ARE YOUR PARTNER FOR TAILOR-MADE PU SOLUTIONS.

Together with you, we take the most advanced raw materials and develop solutions that meet your needs exactly. We can accompany you in every step of your production and throughout every phase of your product development.

WE BELIEVE IN WORKING WITH CLIENTS, NOT JUST FOR THEM.

From the improvement of recipes and the research and formulation of new product solutions to the development of more efficient processes and delivery cycles, we cover the entire value chain. In addition to this, our service portfolio includes a wide range of training courses, reliable logistics services and proactive customer support.

#BETTER TOGETHER

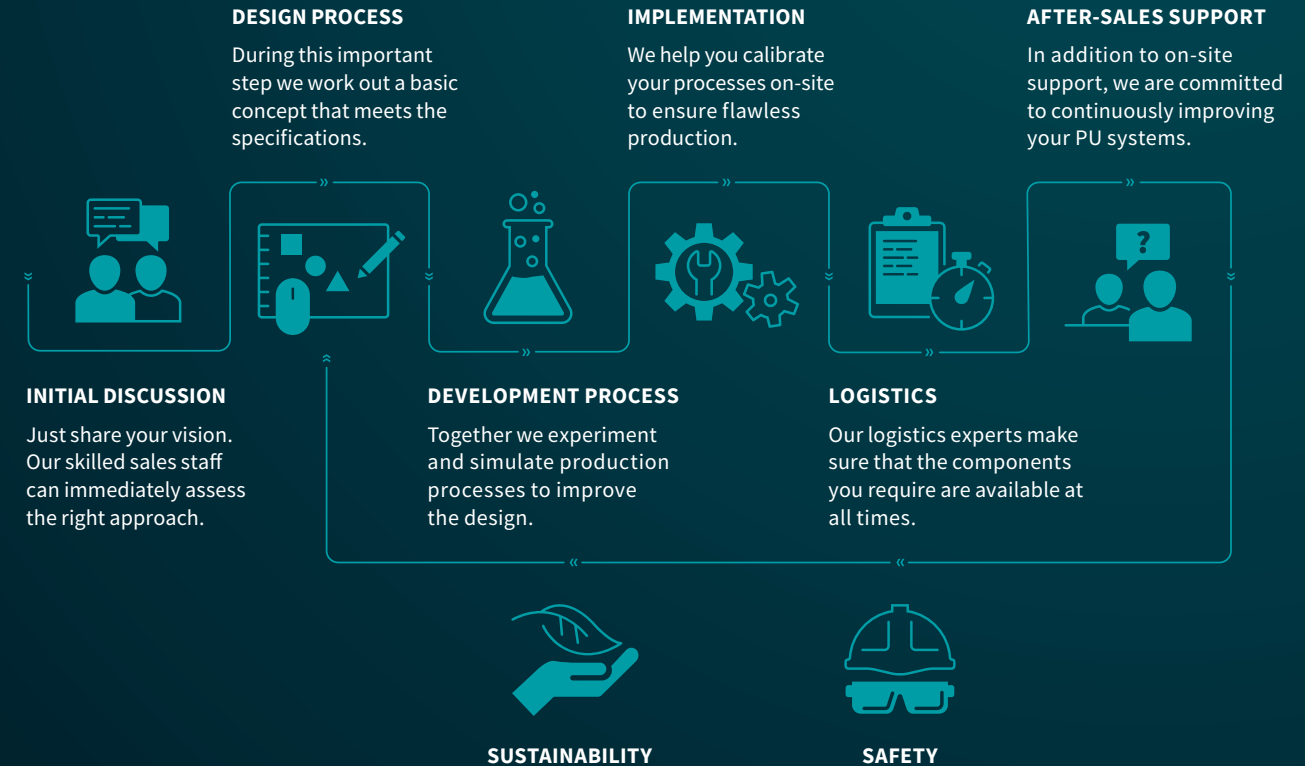

» **DISCOVER PURE
EXXCELLENCE**

LET'S TEAM UP

WE GO THE EXTRA MILE WITH YOU.

We see ourselves as your partner, as a stakeholder in your end products. We have therefore made it our mission to supply you with one thing above all else: improvements. With regard to the status quo, the competition, or how things have been done up to now, we always come up with new ways to improve your product – and, as a result, improve your company's success.

»» THIS IS HOW WE WORK

VERSATILE SYSTEMS FOR NEW IDEAS.

From functional automotive components to comfortable mattresses, from appliances and construction materials to footwear and sports equipment – polyurethanes are incredibly versatile and inquisitive engineers continue to find new methods to implement them in innovative ways. This powerful material can be processed to be foamed or compact and flexible or rigid.

WE FIND A PU SOLUTION FOR EVERY APPLICATION.

Our PU systems are used in various industries and for countless different applications. Even if your industry is not mentioned, we are certain that we can find the perfect solution for your project. Our experts are always available to answer your questions, so do not hesitate to contact us.

A CHOICE WE MAKE EVERY DAY

At PLIXXENT, not only do we focus on safety in all our own activities and in the usage and handling of our products. We also care for our customers and offer training and assessment sessions to ensure the greatest focus on safety anywhere our products go.

CUSTOMER SAFETY

We take the safety of our customers very seriously. If we notice any safety issues at our or their sites, we flag them immediately. Furthermore, we offer free training and assessment sessions.

EMPLOYEE SAFETY

Our employees are our greatest asset, so we focus on creating a safe working environment for them. All staff members are comprehensively and continuously trained to think and act safely.

PRODUCT SAFETY

We work closely with customers, traders, and the public to ensure our products are safely handled. Many are subject to extensive information disclosure requirements, which we regularly exceed.

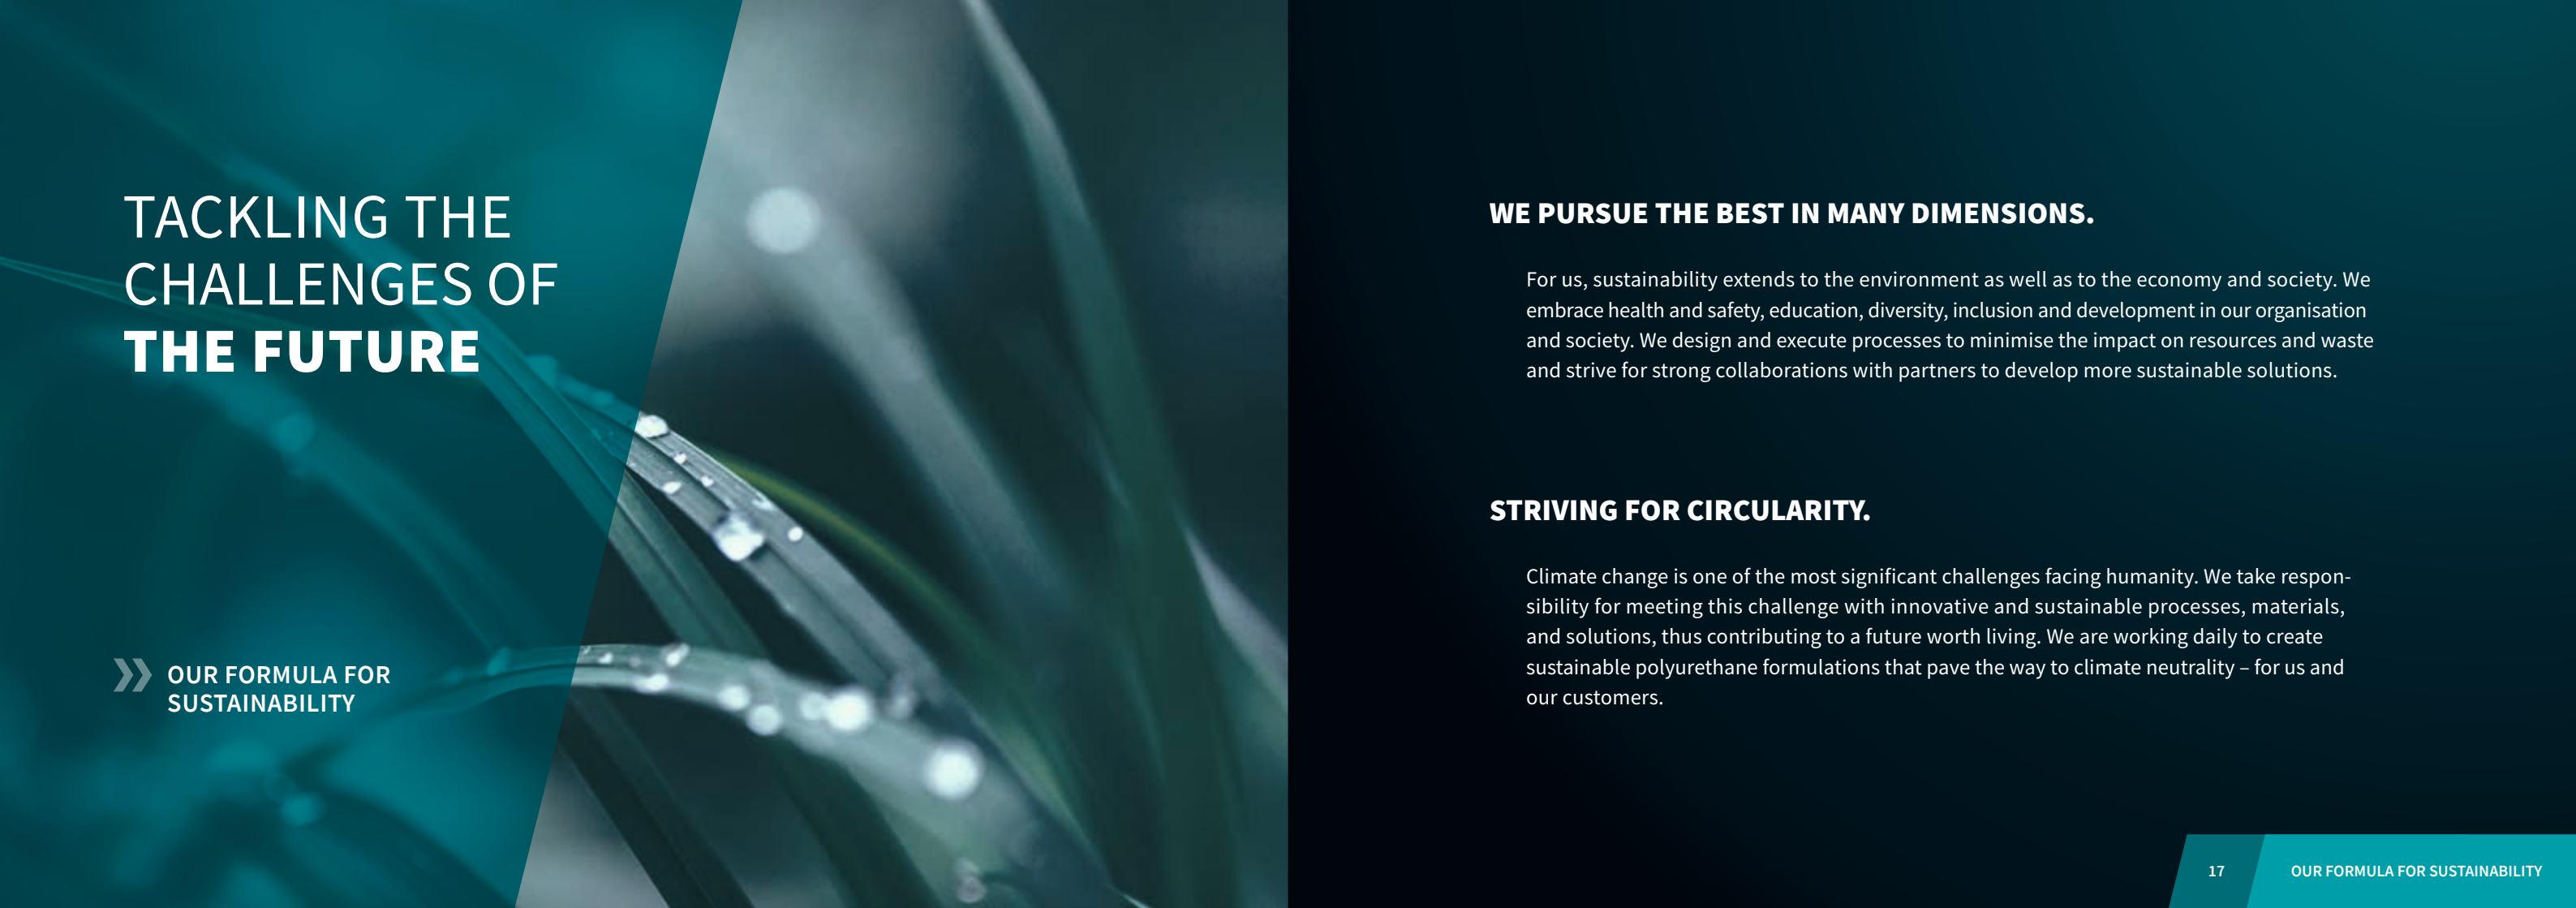

PLANT SAFETY

Our facilities are frequently updated to incorporate state-of-the-art safety technology, including intelligent maintenance systems that replace components long before they fail.

TRANSPORT SAFETY

To guarantee maximum levels of safety during transport, our external logistics service providers are carefully selected through a standardised process and are regularly evaluated.

TACKLING THE CHALLENGES OF **THE FUTURE**

» OUR FORMULA FOR
SUSTAINABILITY

WE PURSUE THE BEST IN MANY DIMENSIONS.

For us, sustainability extends to the environment as well as to the economy and society. We embrace health and safety, education, diversity, inclusion and development in our organisation and society. We design and execute processes to minimise the impact on resources and waste and strive for strong collaborations with partners to develop more sustainable solutions.

STRIVING FOR CIRCULARITY.

Climate change is one of the most significant challenges facing humanity. We take responsibility for meeting this challenge with innovative and sustainable processes, materials, and solutions, thus contributing to a future worth living. We are working daily to create sustainable polyurethane formulations that pave the way to climate neutrality – for us and our customers.

PUR^{e3} SOLUTIONS

We make PU sustainable.

Polyurethane, like all synthetic materials, is mainly produced from fossil sources. Or rather, it was. With PUR^{e3} Solutions, we are introducing a new range of polyurethane systems made from up to 94% renewable, reused and/or recycled raw materials.

Across all applications, our new PUR^{e3} Solutions product line offers our customers high-quality, sustainable polyurethane alternatives - flexible, rigid, foamed or compact. And as always with PLIXXENT, tailored to their needs and requirements.

Up to **94%**

OUR PUR^{e3} APPROACH

We rely on three main pillars regarding the raw materials and the production processes for manufacturing and processing our sustainable polyurethane systems.

» PUR^{e3} SOLUTIONS

REDUCE

Reducing the amount of fossil raw materials by using renewable, non-fossil-based ones, e.g. producing polyols from plants and by offering ISCC+ certified mass balanced systems.

REUSE

Reusing end-of-life bio and industrial products to produce our PUR^{e3} Solutions to minimise waste and ensure product circularity.

RECYCLE

Working closely with industry partners and research institutes to develop economic solutions that return old PU to their chemical starting point, making them fully recyclable.

BIG IN EUROPE

With numerous international production, sales and warehousing locations, we live up to our promise: we are close to the customer, not only figuratively, but in a literal geographical sense. Fast response times, short delivery routes and reliable availability make us a valuable local partner for our customers throughout Europe.
